PAPER LANTERN CRAFT

INSTRUCTIONS

1. Print out the artwork onto 8.5"x11" white paper. The heavier weight the paper the better.

If you want to make wider lanterns these will require 2 sheets each. To make shorter lanterns, trim some material from the long edge using scissors or a paper cutter.

2. Apply double stick tape to along one short edge of the sheet and bring the 2 short edges together to form a cylinder.

3. Cut the handles out along the cut lines. Apply a small peice of double sided tape to each end and attach to the lantern cylinder along the inside top.

4. ONLY USE BATTERY OPERATED VOTIVES INSIDE THESE PAPER LANTERNS!

Alternately you can wrap the sheets around glass vases or candle holders.
